# Previous Mac Installation Actions

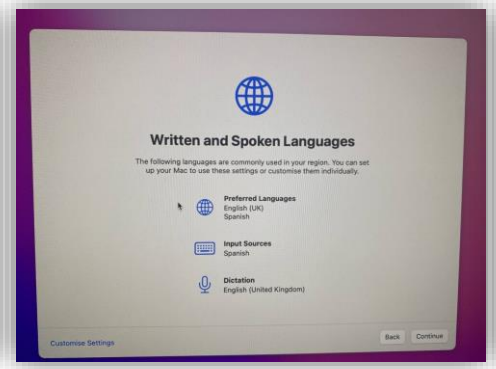
To begin, confirm that you have your domain\user and UPN (user@dominio). Keep in mind to use the password provided by your manager and ensure that multi-factor authentication (MFA) is activated, as neither EUT nor Support ODS provides user keys.

Check with Support ODS at Support_ODS@gruposantander.com to verify that the Azure user has the following:

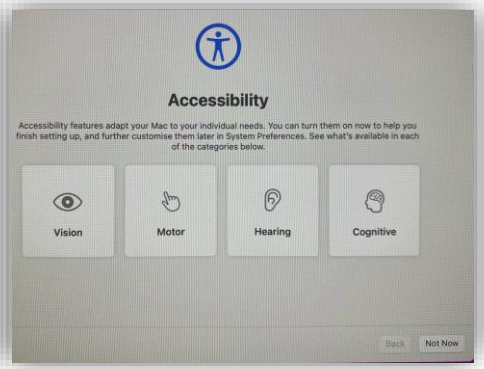
- O365 **E3 License**
- Enterprise **Mobility + Security E5 License**
- Membership in the group **GR_JAMF_condicional_Access**

Furthermore, make sure you have either a WiFi connection or an unmanaged direct internet network cable available for installation.

Turn on your MacBook and follow the wizard, select your country and tap **Continue**

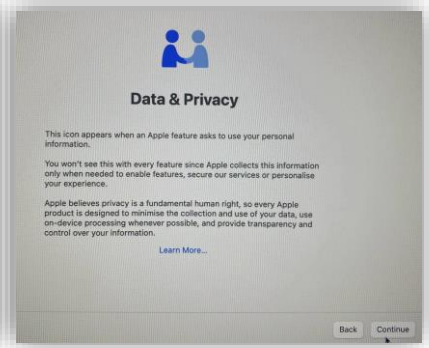


Select your language preferences and tap **Continue**

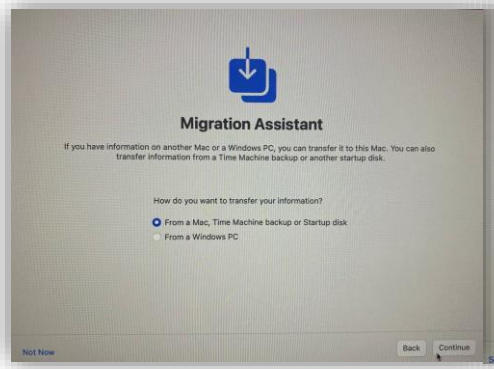


Set accessibility options or tap **Not Now**

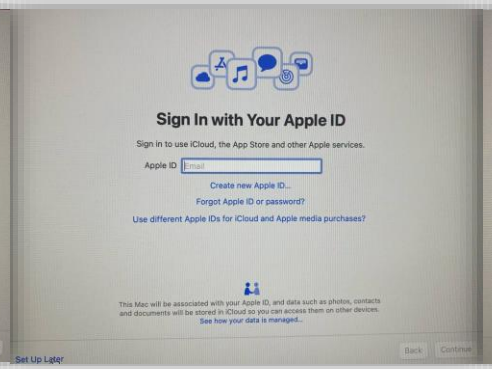
Connect to your Wi-Fi network and tap **Continue**



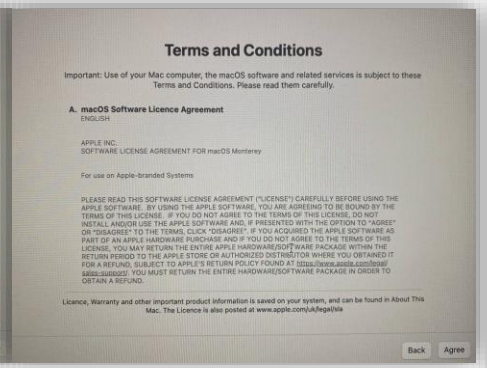
Click **Continue** under Data & Privacy



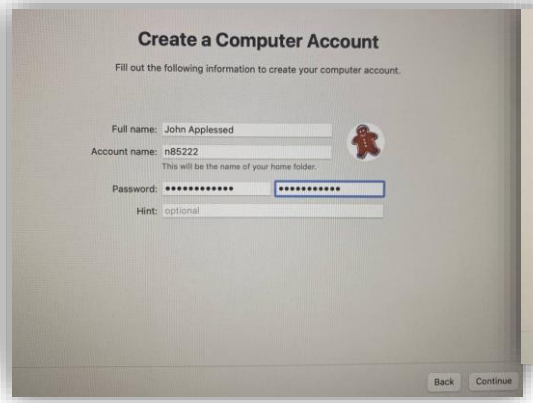
In the migration assistant, tap **Not Now**



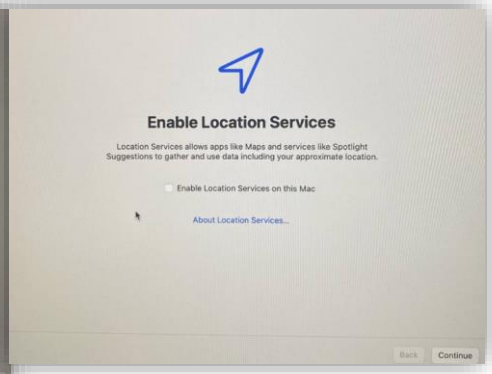
Sign into your Apple account or tap **Set Up Later > Skip**



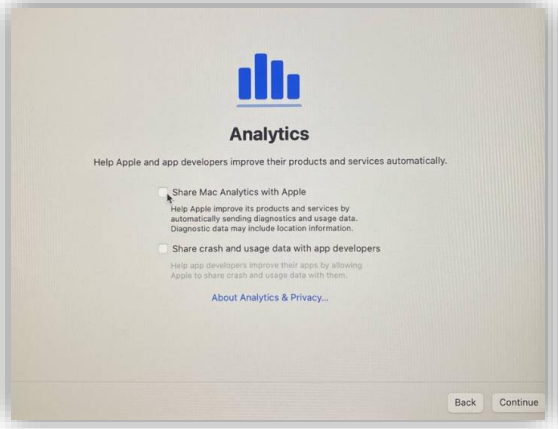
Accept Terms and Conditions and click **Agree**



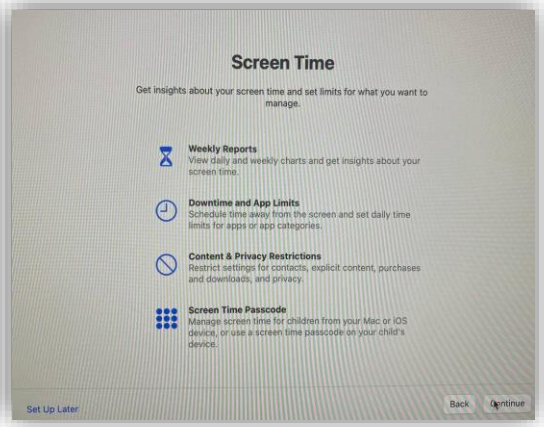
In the next window enter your
Full Name: **Enter your First Name, Last Name**
Account Name: Your **Employee ID**
Office365 password.



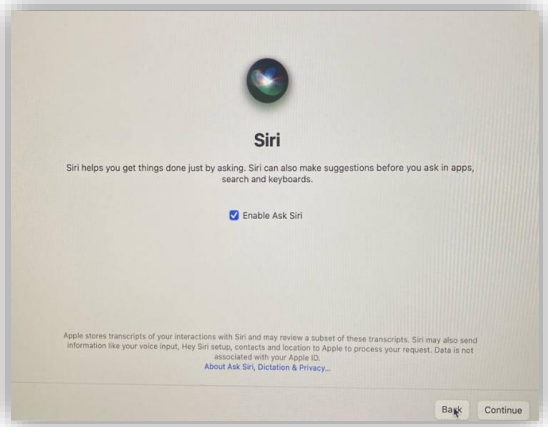
Select Location Services and tap **Continue**



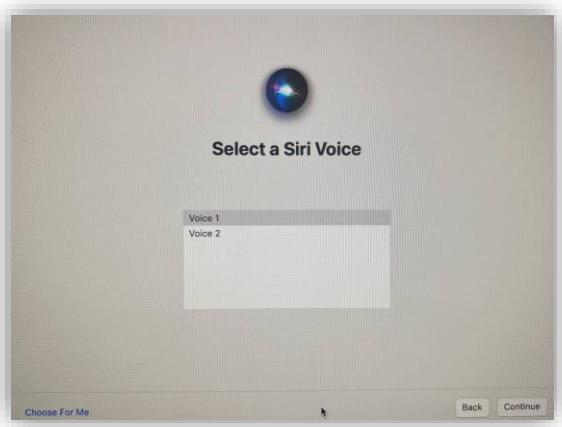
Uncheck Share Mac Analytics with Apple and tap **Continue**



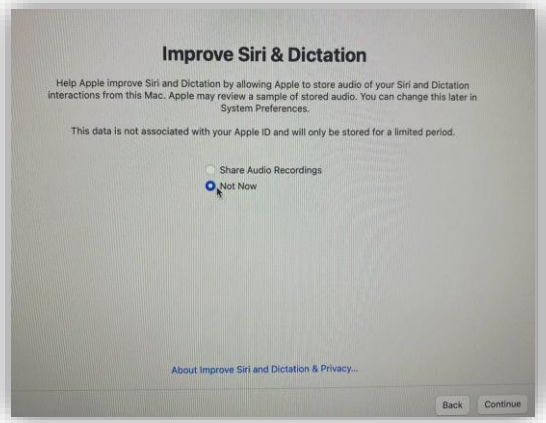
Tap **Continue** to Screen Time



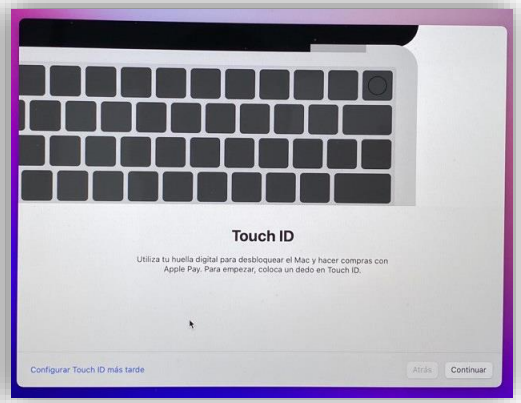
Enable Siri if you want and tap **Continue**



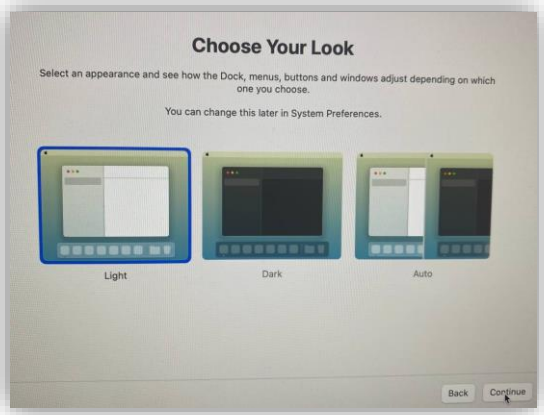
Select Voice and tap **Continue**



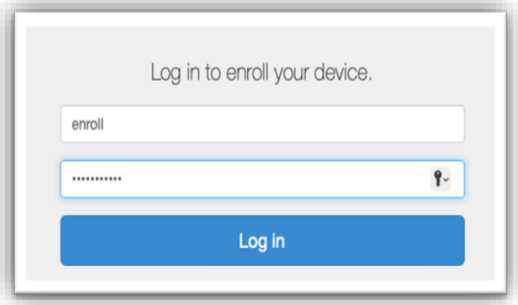
In this window check **Not Now** and press **Continue**



Set up your Touch ID fingerprint or you can do it later, tap **Continue**

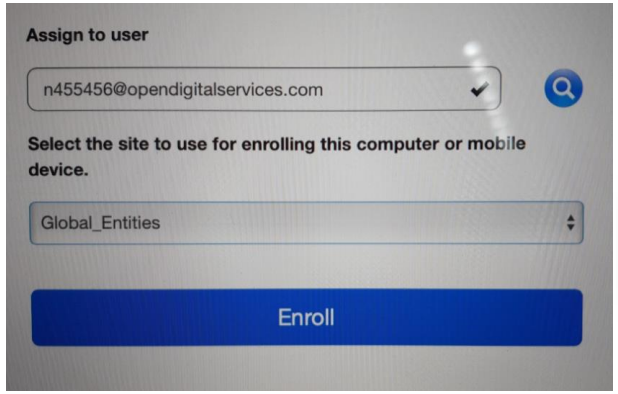


Select the look you want and tap **Continue**

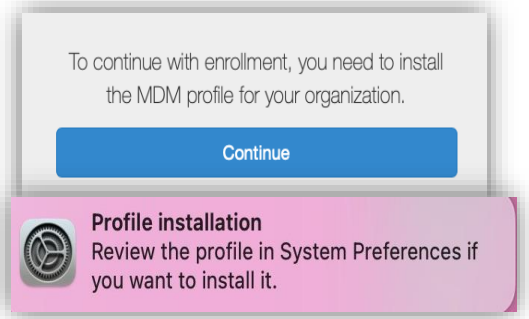


Open the following URL in Safari
**https://santandergroup.jamfcloud.com/enroll/**
and enter the following user:

Username: enroll
Password: Pr0duban?32

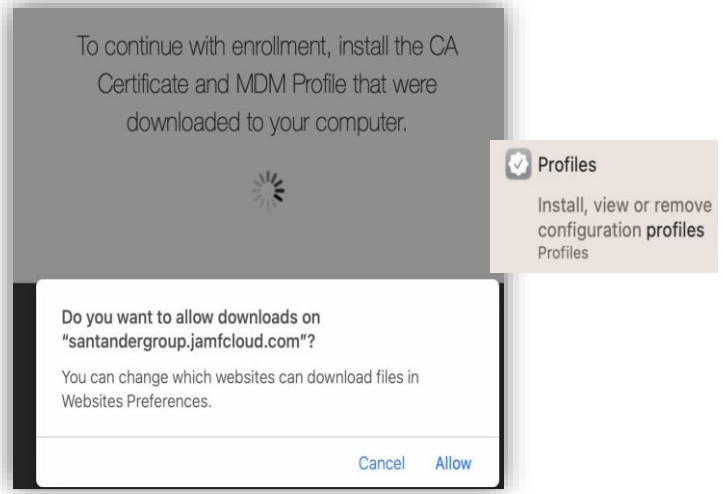


Enter your Office365 **X/N** user, and click on the search button (x/n@opendigitalservices.com), select **Global_Entities** and press **Enroll**

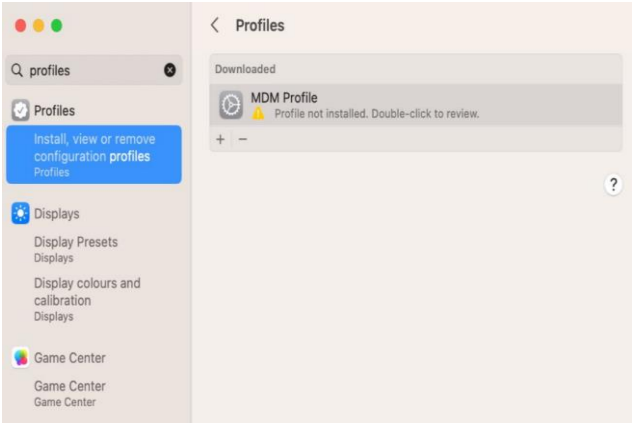


Then the "**mdm profile**" will be downloaded, press **Continue**

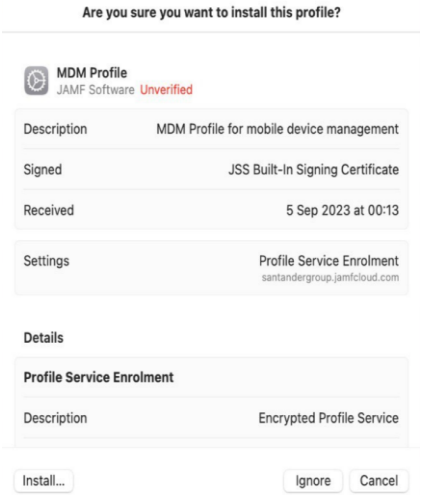
**NOTE: The Office365 user may change depending on your company**

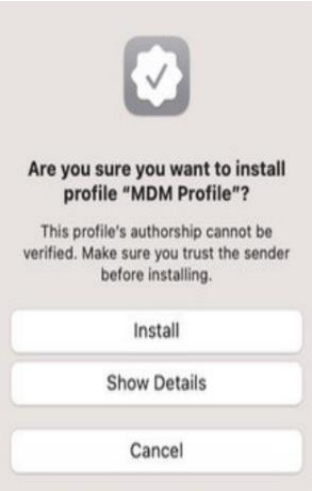


Tap **Allow** to download > Open the downloaded profile in **System Preferences\Profiles**

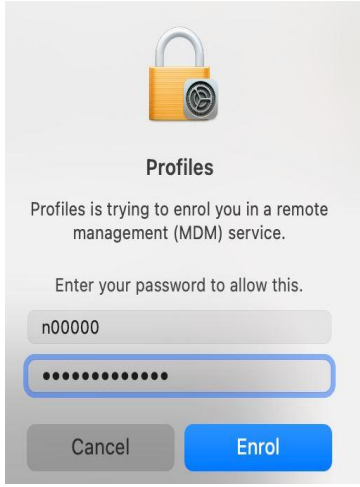


Double-click on the MDM profile

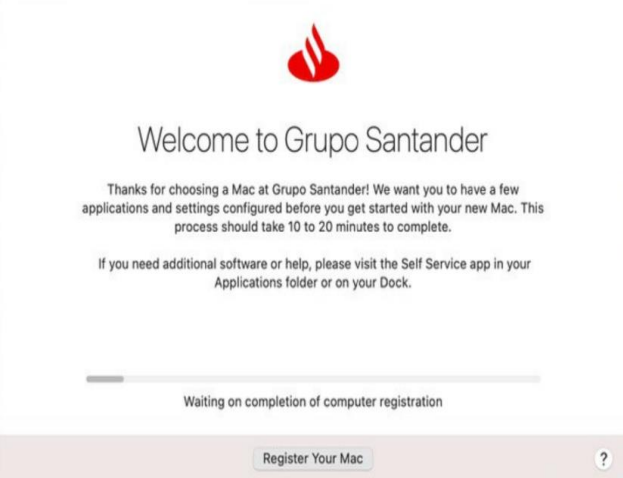




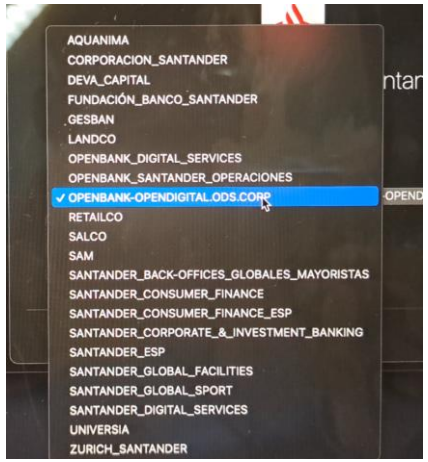
Click **Install** MDM profile and **Install again**

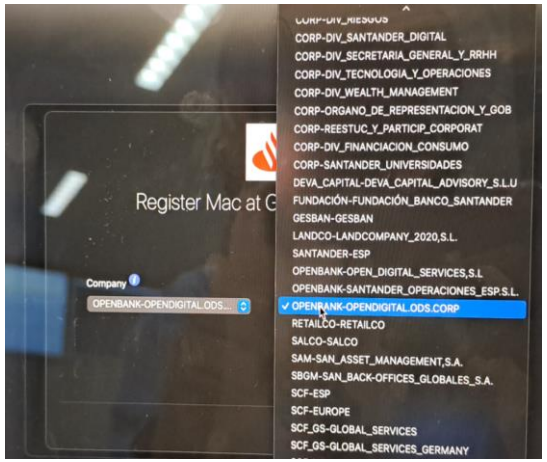


Enter your computer **login password** and tap **Enroll**



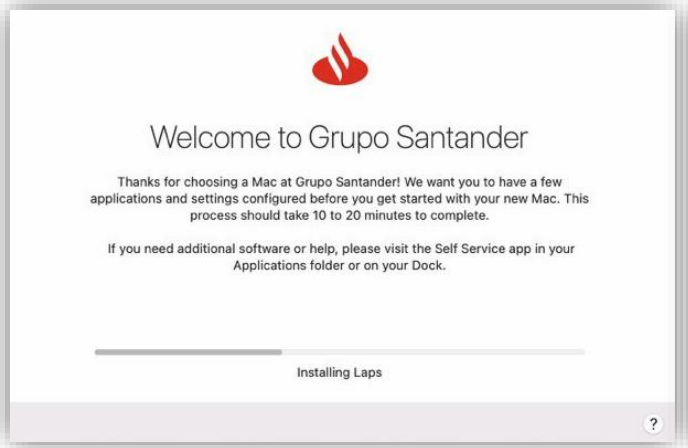
Wait until the registration window appears and tap **Register Your Mac**

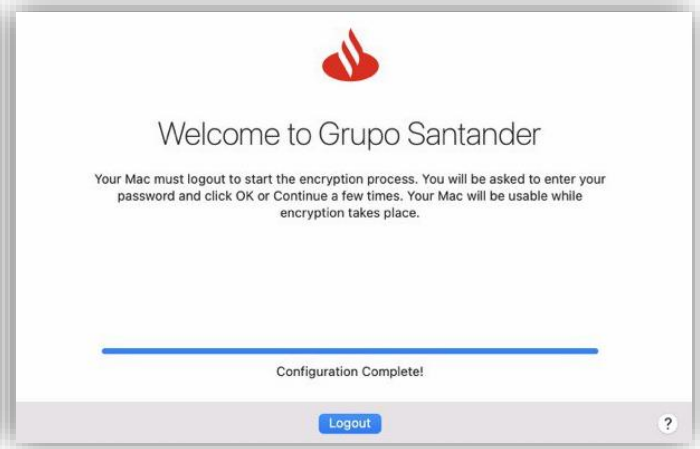




Then select your Company + Division and put **Register Your Mac**

**Para SANHQ (USUARIO UPN @GRUPOSANTANDER.COM):**
**OPENBANK_DIGITAL_SERVICES > OPENBANK-OPEN_DIGITAL_SERVICES,S,L**
**Para Openbank (USUARIO UPN @OPENBANK.ES):**
**OPENBANK_SANTANDER_OPERACIONES > OPENBANK-SANTANDER_OPERACIONES_ESP.S.L.**
**Para OpenDigitalServices (USUARIO UPN @OPENDIGITALSERVICES.COM):**
**OPENBANK-OPENDIGITAL.ODS.CORP > OPENBANK-OPENDIGITAL.ODS.CORP**

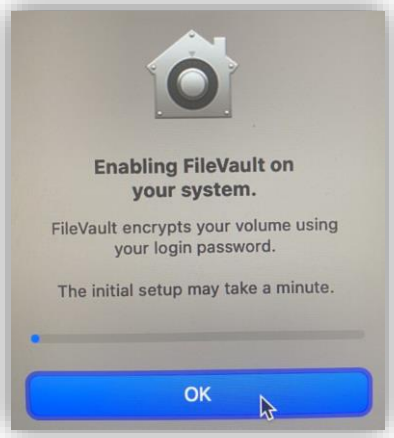




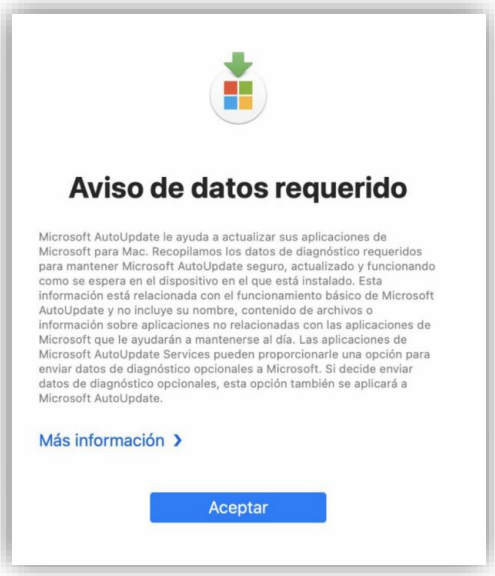
**NOTE: The installation process will range from 20 to 30 mins to complete and depending on your connection speed.**
> Once the installation is finished, you will see the following window, click on **Logout**

Once the configuration is complete, this message will appear before the restart, press **OK**

Tap **Enable Now > OK** to enable encryption of your hard drive



PRESS **OK**

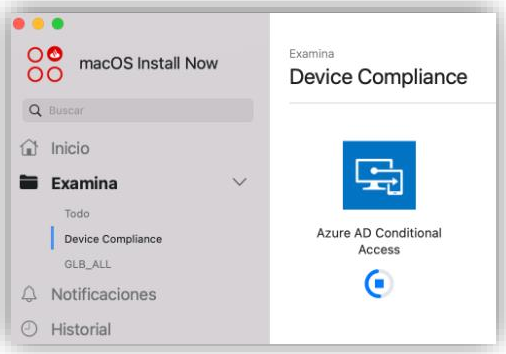


Tap **OK** on the reminder

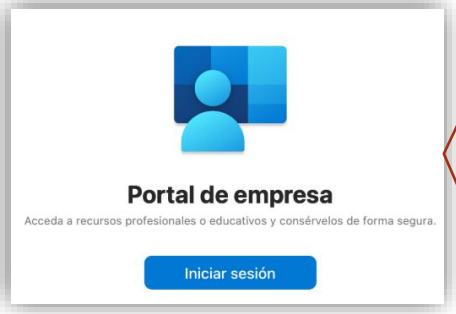
**NOTE: After 10 mins the computer will restart automatically.**

## Post-installation process

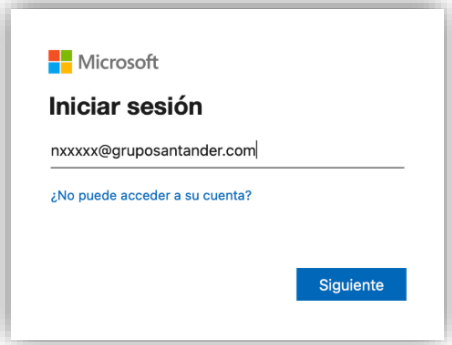
**NOTE**: It is mandatory to configure Google Chrome as default browser and allow pop ups on Google settings

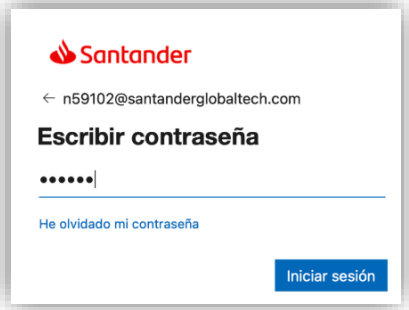


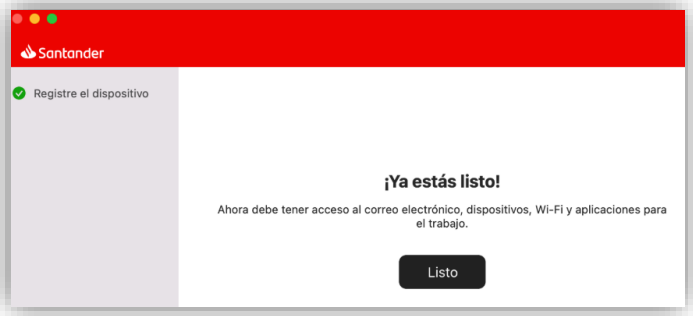
Search for 'Conditional' on Self Service and install **Azure AD Conditional Access 2.**



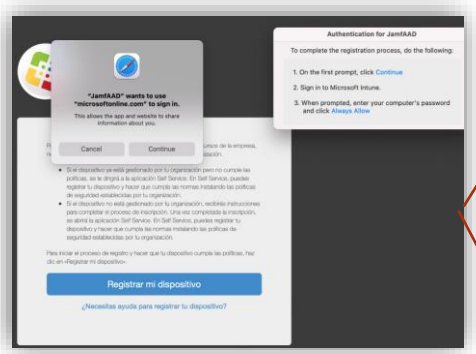
The company portal will open. **Log in** with your Offiice365 user as shown in the following windows.



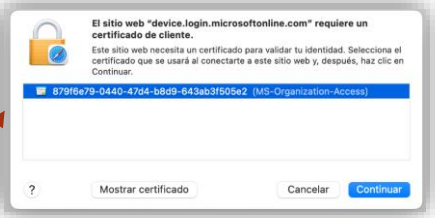




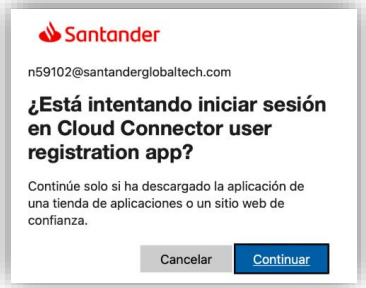
Approve the request using the authentication method you have set up in your MFA and continue with the registration by pressing **Ready**.



In the next window, press **Continue and Always Allow** to grant access to the Microsoft Workplace Join Key certificate.



*This is the **local Mac password** setup earlier

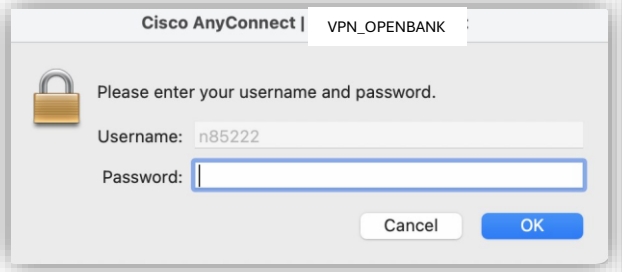


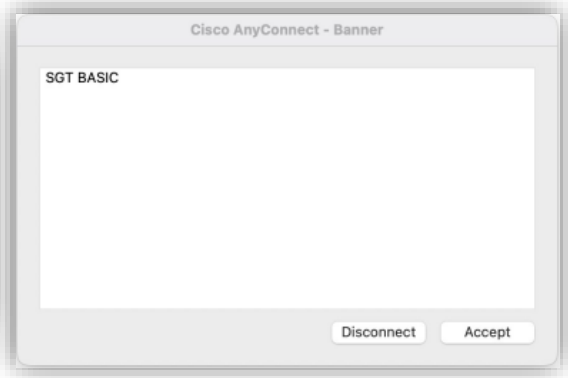
Press **Continue** to finish the registration process, and the window will close automatically.

**NOTE:** Apple Connect must be running with the VPN to synchronise the password change, and every time you want to change it.

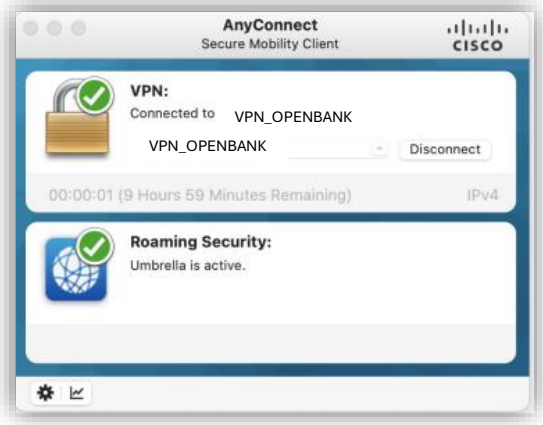
## Device startup and installation

After restarting your Mac, log in with your **employee ID N***** or X****** and** Office 365 password.

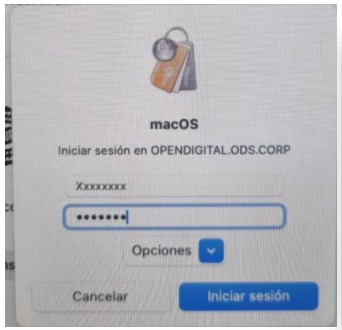




Connect to the VPN with your employee id **N***** or X****** and** Office365 password.



In the next step you will need to synchronise your local password with your domain password via Apple Connect.



Enter your employee id **N***** or X******* and** Office365 password.

**NOTE:** Apple Connect must be running with the VPN to synchronise the password change, and every time you want to change it.

# After installation

- Set up O365 services (Outlook, Teams, OneDrive, etc.) In case of error, contact Support ODS Support_ODS@gruposantander.com that the device is compliant
- Confirm that Netskope is active, and the Umbrella proxy disabled
  1. notskope.com
  2. Cisco Umbrella Policy Checker
- It is recommended that the PersonalKey and JoinKey are trusted > always trust
  1. Open keychain - Log in section - My certificates section - Verify that there are 2 certificates - Click right on each one - Get info - Always trust

# Thank You.

Our purpose is to help people and businesses prosper.

Our culture is based on believing that everything we do should be:

## Simple Personal Fair
